About

Solid Rock Steel Fabricating Co. Ltd. is located on five acres of industrial property, strategically located one mile north from the junction of 176th Street (Pacific Hwy. #15) and the Trans Canada Hwy #1 in Surrey, British Columbia. Founded in 1965, we have celebrated many years of successful service in the steel fabrication business.

We offer a full range of custom services; from connection design, detailed shop drawings, fabrication, welding, sandblasting & painting to complete field installation. We are Canadian Welding Bureau (C.W.B.) approved to CSA Standard W47.1-1983 Division 1. Our shop has a total covered floor space of 34,000 square feet, combined shop lifting capacity of 40 tons and a large three acre outdoor service yard. We are equipped with all the standard fabricating equipment, including stud welding machines, plasma, Submerged Arc Welding (S.A.W.) machines and a shear.

While our main forte is to supply & install custom architectural structural steel in the Lower Mainland, we have shipped fabricated metal work all over the world. (France, Cyprus, Chile, Hawaii, etc...). We are members of the Canadian Institute of Steel Construction (a national organization representing the structural steel, open web steel joist and plate fabricating industries) and the Vancouver Regional Construction Association. We are also affiliated with the International Association of Bridge, Structural and Ornamental Iron Workers - Shop local Union 712 and Field local Union 97.
